

# Compact Camera

## Fits in domes, small spaces and your budget

High-performance cameras at an economical price

Compact Cameras from GE Security deliver performance and value in a compact size. Designed to fit inside fixed-camera domes, they can also be mounted in tight spaces. Inside a dome or out, compact cameras are ideal for grocery and convenience stores, retail shops, restaurants, bars and coffee houses, offices and other small businesses. And with the available heavy-duty, weatherproof dome, you can use compact cameras in outdoor applications such as parking lots and equipment yards.

Compact cameras are available in black-and-white and two color models, one with Ex-View™ sensor technology and adjustable gain control. The Ex-View camera features superior low-light performance and sensitivity to infrared light-as low as 0.1 lux. That means you can capture useable surveillance images

Compact GE Security cameras fit in tight spaces, indoors or out. You can mount them either on their own or in a fixed-camera dome, using a heavy-duty, weatherproof dome for harsh outdoor applications.

in near total darkness.

All compact cameras feature advanced technology to give you superior pictures. Digital backlight compensation prevents important foreground objects from becoming lost against bright backgrounds such as doorways, windows, or loading docks. A variable, high-speed electronic shutter automatically adjusts to changing conditions from low light to bright sunlight. And digital auto-tracking white balance on color models renders colors accurately, even under adverse lighting conditions.

### Compact camera features

- Choice of black-and-white or color cameras
- 600 TV lines resolution (black-and-white), 480 TV lines (color)
- 0.02 lux sensitivity (black-and-white and color with Ex-View), 0.05 lux (color)
- Variable high-speed electronic shutter
- Automatic backlight compensation
- Auto-tracking white balance (color models only)
- Accepts C- and CS-mount lenses with manual or AES (color models) or DC auto-iris control

# High-performance features in a compact package

## Small camera, small price... big performance

Now you don't have to sacrifice full-size performance when you need a compact camera. GE Security's compact cameras deliver the kind of high-end performance you expect from a standard traditional camera—but in a compact

and economical alternative. If you have applications that require a space-saving camera, you can still install a feature-rich camera that delivers the image quality you need.

### Available Ex-View sensor

Compact cameras give you excellent performance in poor lighting conditions; on cameras with Ex-View sensor technology, you can even capture images in near total darkness.

### Compact size

Designed to fit inside fixed-camera domes, compact cameras can also be used in applications where space is limited.

### Choice of lenses

All compact cameras accept both C- and CS-mount lenses. Camera accepts lenses with manual iris, DC auto iris or AES auto iris on color models.

### Variable, high-speed electronic shutter

Automatically adjusts to changing conditions from low light to bright sunlight.

### Automatic backlight compensation

Prevents important foreground objects from becoming lost against bright backgrounds.

### High-resolution images

The black-and white camera delivers 600 TV lines resolution; color models offer 480 TV lines, giving you clear, detailed pictures that make identification easier.

### Auto-tracking white balance

Color cameras automatically adjust to render colors accurately, even under adverse lighting conditions.

### GE quality and support

The GE logo is your promise of a quality product and dependable support.
