

Covert cameras

Watch without being seen

Hidden cameras capture pictures without giving themselves away

While the presence of surveillance cameras can often deter criminal or other undesirable behavior, there are instances where you want a perpetrator to think he can get away undetected. That's when you need covert cameras from GE Security.

Covert cameras are concealed inside common objects such as exit signs, smoke detectors, thermostats and clocks. So even if a perpetrator avoids your conventional surveillance cameras, you can still capture critical evidence to make a positive identification and resolve incidents quickly.

GE Security offers three lines of black-and-white and color cameras in a variety of models for indoor applications. Advanced technology to give you better pictures. Digital backlight compensation prevents important foreground objects from becoming lost

Covert cameras can be hidden inside common objects including (top, left to right) smoke detector, PIR and exit sign; (bottom, left to right) clock, emergency light and thermostat.

A working exit sign can be mounted on a wall or ceiling with a high-resolution camera hidden inside.

against bright backgrounds. A variable, high-speed electronic shutter automatically adjusts to changing conditions, such as when lights are turned on and off. In addition, a plug-in power supply and easy-connect leads make installation fast and simple.

Covert camera features

- Choice of color and black-and-white cameras
- 400-580 TV lines resolution (black-and-white), 350-480 TV lines (color)
- 0.1 lux sensitivity (black-and-white), 1.0 lux (color)
- Variable high-speed electronic shutter
- Automatic backlight compensation
- Wide choice of covert housings

GE Security

Choose a covert camera to fit your application

Hidden cameras don't let them get away

Even if you have conspicuous surveillance cameras installed throughout your facility, you should include covert cameras as part of a well-coordinated security system. For example, shrinkage is a significant problem in many warehouses and distribution centers where

workers have access to high-value products. By hiding a camera inside a common object like an exit sign or emergency light, you may be able to catch a perpetrator who knows how to avoid your other cameras.

Ultra

- Choice of color and black-and-white cameras
- 580 TV lines resolution (black-and-white), 480 TV lines (color)
- 0.1 lux sensitivity (black-and-white), 1.0 lux (color)
- Smoke detector housing with up to four adjustable side-viewing cameras and one down-viewing camera
- Choice of fixed or pinhole lens

Premier

- Choice of color and black-and-white cameras
- 425 TV lines resolution (black-and-white), 380 TV lines (color)
- 0.1 lux sensitivity (black-and-white), 1.0 lux (color)
- Choice of housings: emergency light, clock, exit sign, PIR, thermostat, smoke detector and ceiling speaker
- Choice of fixed, varifocal or pinhole lens

Value

- Choice of color and black-and-white cameras
- 400 TV lines resolution (black-and-white), 350 TV lines (color)
- 0.1 lux sensitivity (black-and-white), 1.0 lux (color)
- Choice of housings: smoke detector and PIR
- 2.5 or 4 mm fixed lens
