

# Discreet cameras

## Preserve a welcoming environment

**Discreet but rugged cameras blend into the background to protect your business**

Discreet cameras from GE Security help you maintain an atmosphere where people want to visit, work or do business without compromising security. They're ideal for art galleries and museums, high-end retail stores, restaurants, resorts, offices, and other environments where you don't want conspicuous security cameras. And because these cameras blend into the background, they often capture more information than you might get from a more obvious surveillance system.

GE Security offers four lines of discreet cameras in a variety of rugged styles for indoor and outdoor applications. Choose from black-and-white, color, and day-night models that automatically switch from color to black-and-white at night to give you 24-hour surveillance.

All discreet cameras from GE Security incorporate advanced technology to give you better pictures.

The Vari-View™ track camera blends in with track lighting in offices, retail stores, galleries, museums and other environments for discreet surveillance.

Discreet cameras come in a variety of housings for both indoor and outdoor applications. Choices include (top, left to right) ball, wall-mount dome and The Brute; (bottom, left to right) corner mount, dual-view and ceiling/wall mount.

Digital backlight compensation prevents important foreground objects from becoming lost against bright backgrounds such as doorways and windows. A variable, high-speed electronic shutter automatically adjusts to changing conditions from low light to bright sunlight, improving performance in outdoor applications.

### Discreet camera features

- Choice of color, black-and-white and day-night cameras
- 400-580 TV lines resolution (black-and-white), 350-480 TV lines (color)
- 0.1 lux sensitivity (black-and-white), 1.0 lux (color)
- Variable high-speed electronic shutter
- Automatic backlight compensation
- Wide choice of rugged models

# Choose a discreet camera to fit your application

---

## Options for outdoor applications

Preserving a friendly, welcoming environment extends outside your business as well. Choose from several cameras in the GE Security Ultra Rugged Line for reliable performance in outdoor applications like courtyards, walkways and parking lots.

All outdoor discreet cameras feature heavy-duty stainless steel or die-cast housings and impact-resistant Lexan® windows to discourage vandals. They're weatherproof, with an IP66 rating against water and dust. And they can work in extreme temperatures from -4 to 122 °F (-20 to 50 °C).

---
