

Dome cameras

Versatile and discreet

Choose a camera and dome to fit your requirements

Fixed mini-domes from GE Security give you a wide range of options for discreet surveillance in both indoor and outdoor environments. They're a good choice for retail, office and other environments where you want to capture high-resolution images without conspicuous security cameras.

GE Security offers fixed mini-domes in five models, including weatherproof and tamperproof models for outdoor applications. The fixed-mount bracket can be tilted up to 90° and swiveled 360° so you can position the camera to get the pictures you need.

Mini-dome cameras are available in black-and-white, color and day-night models. Day-Night cameras automatically switch from color to black-and-white at night to give you 24-hour surveillance.

All GE dome cameras feature advanced technology to give you better pictures. Digital backlight compensation prevents important foreground objects from becoming lost against bright backgrounds such as doorways, windows,

Fixed camera domes come in a variety of styles including (top, left to right) pendant-mount dome, flush-mount dome, four-inch dome and wall-mount pendant dome; (bottom, left to right) multi-view dome and rugged Vari-View dome.

or loading docks. A variable, high-speed electronic shutter automatically adjusts to changing conditions from low light to bright sunlight, important in outdoor environments such as parking lots and walkways. And digital auto-tracking white balance on color models renders colors accurately, even under adverse lighting conditions.

Dome camera features

- Choice of color, black-and-white and Day-Night cameras
- 400-580 TV lines resolution (black-and-white), 350-480 TV lines (color)
- 0.1 lux sensitivity (black-and-white), 1.0 lux (color)
- Variable high-speed electronic shutter
- Automatic backlight compensation
- Wide choice of models and domes

The rugged Vari-View™ dome camera features a heavy-duty style and impact-resistant Lexan dome for outdoor and industrial applications.

GE Security

Choose a dome camera to fit your application

High-performance dome cameras for fixed domes

The GE Security line of high-resolution dome cameras is a perfect fit for fixed-dome applications. The black-and-white camera delivers 600 TV lines resolution; color models deliver 480 TV lines, giving you sharp, detailed images. You can also specify a high-performance color camera

with Ex-View™ Sensor technology and adjustable gain control. Designed for superior low-light performance and sensitivity to infrared light, the Ex-View dome camera is sensitive to 0.02 lux. That means you can capture useable surveillance images in near total darkness.
