SECURITY MADE SIMPLE WITH SIMON

Simon is not only the world's most advanced wireless security system, it is also the easiest security system to install and operate available today. From hassle-free installation, to ultra-sophisticated sensor design and a full range of

innovative "user friendly" features, Simon puts the power of new technology at your command like never before. When it comes to protecting the things you value the most; Simon is simply your best choice!

Peace of Mind

Installation. Because it's wireless, Simon installs in hours, not days – with no mess, no wires, no dust or imposition.

You Are Never Alone. Simon is designed to respond instantly to any type of emergency (fire, intrusion or personal) – automatically or with a touch of a button.

System Control to Carry with You.

Simon offers pushbutton control you can carry on a keychain or keep bedside.

"SYSTEM IS ARMED"

Easy to Understand

System Operation. Simon's built-in digital voice directs you through every step of operating the system. It is so simple that even a small child can follow the instructions and use the system.

Custom Designed for You. Simon offers a full range of built-in security features, such as a door chime that lets you know when a child has opened an outside door or when a customer has entered your business.

24 / 7 RESPONSE

A FULL RANGE OF SELECTABLE OPTIONS

WIRELESS SECURITY

Less Worry for Working Parents. Parents need to know when their children are home safely from school. If a child does not disarm the system within a scheduled time, Simon will call your telephone or pager to let you know.

Be Informed, Wherever You Go. Simon can call any telephone and leave a clear, concise voice message notifying you of system events such as alarms, latchkey disarming and more.

Your Direct Voice Connection to Emergency Response.

Simon provides a nearly instant voice connection to the central monitoring center in the event of an emergency – without the need to press buttons to talk or listen to the operator.

Even More Control.

Only Simon offers a supplementary talking touchpad to serve a back door or master bedroom.

Special Care for Elderly or Disabled.

Simon is designed with special security needs in mind. In addition to a full range of personal emergency pendants, Simon can call for help should it detect a lack of activity within your home or business.

X10 Control. Simon gives you the option to control lights and appliances with X10 line carrier technology – by schedule, by event or with the press of a button.
